

Professional Profile

Senior Microsoft Dynamics 365 CRM Developer with 2.5+ years of hands-on experience delivering enterprise solutions using Dynamics 365, .NET, Power Platform, and Azure services. Expert in CRM customization, plugin development, business process automation, complex integrations, and data migration. Proficient in Power Apps, Power Automate, and Copilot Studio for building AI-driven tools and automations.

Core Competencies

CRM Development

- Dynamics 365 Customization
- Plugin/Workflow Development
- Power Apps/Power Automate
- SSIS/SSRS

Technical Skills

- C#, .NET, JavaScript, jQuery
- HTML/CSS, Bootstrap
- SQL Server, MySQL

Third-Party Integrations

- Odoo ERP Integration
- LGI Inspection System
- Marketo Lead Management
- External Systems Integration

Integration & Automation

- REST/SOAP APIs
- Azure Functions
- SharePoint Integration
- External System Sync

AI & Tools

- Copilot Studio
- Azure OpenAI
- Power BI
- Visual Studio, XRM Toolbox

Communication Systems

- Twilio SDK
- Custom Telephony Solutions
- Real-time Data Sync
- Webhook Implementation

Professional Experience

SkySoft Connections – Senior Microsoft Dynamics CRM Consultant

Sept 2024 – Present

- Designed and implemented CRM solutions for Sales, Operations, and Customer Service
- Developed custom plugins and workflows using C# for complex business requirements
- Conducted large-scale data migration using SSIS with full validation
- Built Power Apps applications and dashboards for process automation
- Automated business processes using Power Automate to improve efficiency
- Implemented third-party integrations with Twilio, Odoo, and external systems

SkySoft Connections – Associate Microsoft Dynamics CRM Consultant

Sept 2023 – Sept 2024

- Contributed to CRM module design, development, and testing for enterprise clients
- Developed custom workflows, plugins, and automated test routines in C#
- Implemented integrations between CRM and external systems for real-time data
- Configured and customized Dynamics 365 Sales, Service, and Marketing modules

Key Projects

RFQ Management System

SharePoint, Power Apps, Power Automate

Delivered a complete RFQ management system for Clark Seals using SharePoint, Power Apps, and Power Automate. Designed structured SharePoint lists with metadata, version control, and automated record creation. Built a Power Apps Canvas App enabling engineers and sales teams to create and update RFQ records with seamless navigation and validation. Implemented multiple Power Automate flows for assignments, user notifications, Excel-to-SharePoint synchronization, and automated duplicate detection. These improvements significantly reduced manual effort by 60% and streamlined the RFQ lifecycle across departments.

Copilot CRM Integration

Azure OpenAI, Copilot Studio, Dynamics 365

Implemented advanced Copilot automation for RSA using Azure OpenAI and Copilot Studio to modernize their CRM operations. Created AI-driven agents that automatically categorize attachments and move them to SharePoint based on type, eliminating manual processing. Developed intelligent flows that generate draft email responses, create case IDs, and assist support agents by analyzing customer messages. The integration combined CRM triggers, generative AI prompts, and contextual workflows to enhance user productivity and reduce processing times by 40% across support operations.

NetCom Learning Sales Solution

Full CRM Implementation

Designed and customized a complete Dynamics 365 Sales solution for NetCom Learning aligned with complex business processes. Implemented custom entities, business rules, workflows, plugins, web resources, and custom APIs for seamless data synchronization with external systems and the corporate website. Developed integrations with RingCentral for communication tracking and Marketo for lead management. Additionally, configured advanced security roles, dashboards, and Power Automate flows. This resulted in a highly scalable CRM architecture supporting sales operations, product catalog management, data import using SSIS and automated lead handling.

Mimojo CRM Solution

Dynamics 365 Sales Customization

Customized the Dynamics 365 Sales module for Mimojo to streamline lead intake, merchant onboarding, and opportunity tracking. Implemented structured Business Process Flows (BPFs) to ensure consistency and compliance across sales stages. Integrated DocuSign for automated contract signing and built custom APIs for real-time synchronization with external portals. Added automated reports and stage-duration tracking to improve transparency and performance monitoring. These enhancements reduced manual work, improved onboarding speed by 50%, and enabled data-driven decision-making.

Oil & Gas Inspection Management System

End-to-End Solution

Designed an end-to-end inspection management solution covering the full lifecycle from RFQ to Job Completion. The system automated lead creation from RFQ emails, inspection assignment, opportunity qualification, and quote generation. Built two-way integration with the LGI inspection system for real-time data synchronization. Custom plugins, workflows, and Power Automate flows handled approval logic, inspector allocation, document processing, and job creation. Also developed dashboards for RFQ tracking, Sales/Operations monitoring, and Inspector Certificate compliance. This solution transformed operations by improving efficiency by 35%, reducing delays, and enhancing process visibility.

IMPAQ Business Therry – Twilio Integration

Dynamics 365 Telephony Solution

Integrated Twilio with Dynamics 365 for IMPAQ Business Therry using a custom Dialer solution. Implemented Twilio Calling SDK for outgoing and incoming call functionality within the CRM interface. Developed a custom interface for call logging, recording, and activity tracking directly within Dynamics 365. Configured real-time synchronization of call data and contact information between systems. Enhanced sales team productivity with click-to-call functionality and comprehensive call analytics, improving customer engagement and tracking.

Odoo-Dynamics CRM Integration

Two-Way ERP-CRM Synchronization and SSIS Data Migration

Led the successful implementation of bidirectional integration between Microsoft Dynamics 365 CRM and Odoo, enabling seamless synchronization of key business entities including Contacts, Accounts, Products, Quotes, and Orders. Designed and deployed automated real-time data flows to ensure consistent and accurate information across both platforms, improving operational efficiency and data reliability. Additionally, managed large-scale bulk data migration projects from Dynamics 365 to Odoo, successfully transferring critical customer records while maintaining

high data quality and integrity. Explored and implemented both standard connector-based and custom development approaches to deliver cost-effective, scalable solutions tailored to business requirements. This initiative significantly enhanced cross-system collaboration and supported a smooth transition to the Odoo environment.

Education

Bachelor of Science in Economics

University of Science and Technology Bannu

2018 – 2022

Intermediate in Computer Science (ICS)
